Bocce

Assessment Breakdown

SET-UP REQUIREMENTS

Equipment: An open-field space, a pallina, and two bocce balls per player participating.

TEST DESCRIPTION

Each player will play three "sets" consisting of two throws each. For the first set, the pallina (white target ball) will be placed at a 30ft. distance from the foul line. Each player participating will then make two throws as close as possible to the pallina. A volunteer will then record the distance from the pallina of both throws in CMs. The same process will be repeated at a 40ft. distance (set 2) and a 50ft. distance (set 3), for a total of six throws.

All measurements in CMs are to be recorded on the bocce skills assessment scoring excel sheet provided. If a player steps over the foul line during a throw, the measurement will not be taken, and he/she will be allowed to repeat the throw without penalty.

SCORING

All measurements will be recorded in CMs on the provided bocce assessment scoring sheet to generate an average distance.
